AIR POLLUTION  
CONTROL OFFICER

Fielding Formway, Manager  
Cherry Point Refinery  
Atlantic Richfield Company  
P.O. Box 1127  
Ferndale, Washington 98225

Dear Mr. Formway:

The Board of Directors of the NWAPA at their November 9, 1977 meeting conditionally approved your company's Notice of Construction and Application for Approval for your proposed coke calciner project. Condition No. 1 restricts the total particulate emission to the atmosphere from the total refinery, including the coke calciner, to 30 tons/month.

On December 12, 1977 I received a letter from you stating that an error had been made in the calculation of the particulate emissions that had previously been emitted from your refinery and requested an amendment to Condition No. 1 of the approved Notice of Construction.

Therefore, at the December 14, 1977 meeting, the Board of Directors considered this matter and duly amended the Condition No. 1 to limit the particulate emission from the total refinery, including the coke calciner operation, to not exceed 60 tons/31 day month.

I have notified the U. S. Environmental Protection Agency of this amendment. A copy of that letter is enclosed for your information.

Sincerely yours,

Glen F. Hallman  
Air Pollution Control Officer
